Just went over there...it is our attorneys that process all of these requests...and from all indications, they are over in Solid Waste Program doing the file pull now (along with other requests). I can't reach Julia to ask her specific times, but I may end up over there later this afternoon and will email you an updated timeframe as I get one.

We're scheduled to sample next week. Don't your water folks have information on wells in the area ? I thought that it was a requirement to register all wells.

FYI, Paul is still not able to get the bedrock background well information from MDNR. I will ask him today to approach the well owners directly to expedite the process.

FYI – Shawn’s response to my request as to whether he could help us get information on the Weber/Progressive Waste Landfill sooner.

Subject: Champ Landfill well information

Paul,

I asked our Solid Waste Management Program for any documents with information on existing wells at the Champ Landfill as you requested. I was informed that these files had already been pulled by the Custodian of Records per the previous Sunshine Request for processing and duplication. They said if you needed this information sooner, you should send a follow up request with specific details on particular information you are interested in and they will try to expedite the request. Please reference the previous Sunshine Request and if this replaces the previous request.

Let me know if I can be of any additional assistance.
